

# GREENLAW GROVE

Our family caring for your family

**Greenlaw Grove is the newest addition to the Thistle Healthcare Group portfolio, the leading Independent Care Provider in Scotland. We currently employ in excess of 1000 staff caring for just over 900 residents.**

The bespoke purpose built facility is based in the idyllic suburb of Newton Mearns in the South Side and offers care for older people over a number of specialist areas in a home from home environment. Our specialist categories include care of older people, older people with dementia and enhanced residential facilities.

Comprising of five units over three floors, our state of the art facility features panoramic views over specially designed landscaped areas including an enclosed fountain garden area and further enclosed sensory gardens for the enjoyment of our residents and their families and visitors.

The facility boasts excellent amenities, including a bistro style café, hairdressing salon, beauty salon and cinema room which can be enjoyed by our residents and their companions. Executive style transport is available for our residents to maintain links with the local community and continue with person centred activities and may ultimately enjoy trips further afield.

The home will also feature a relative's room should an overnight stay be required.

We would be delighted to discuss our facility and services in more detail and welcome your enquiry regarding a potential residency within the home.
